Vaccinations

Diphtheria	This is caused by bacteria that lead to respiratory or cardiovascular problems.
Tetanus	This is a vaccine that prevents tetanus. Tetanus is an infection and its causative agent is Clostridium tetani.
Pertussis	Whooping cough caused by Bordetella pertussis.
MMR (Measles, Mumps, Rubella)	Prevents measles, mumps, and rubella to individuals.
Hepatitis B	It infects body organs like the liver.
Varicella (Chickenpox)	Rashes all over the parts of the body.

ACKNOWLEDGMENT/WAIVER

I, _____, was informed in detail about the vaccination program and the importance of vaccination by the Health Institution I applied to. I understand that communicable diseases that can be prevented are much more common and harmful among unvaccinated people.

In the light of all this information, I voluntarily refuse to vaccinate. I know and accept that the Health Institution has no responsibility for the damage and/or health problems that I may suffer due to my refusal. I also know and accept that I may be prevented from participating in events and platforms where vaccination is mandatory.

I permit that this document can be shared to any facilities or institutions if needed.
